

MILWAUKEE COUNTY COMMISSION FOR PERSONS WITH DISABILITIES

June 8, 2015, 1:00 PM

St. John's Properties, Eilers Conference Room

1800 N. Prospect Ave, Milwaukee

(Voice) 278-3932

(TRS) 711

(Fax) 278-3939

AGENDA

<u>Info.</u>	<u>Action</u>
<p>1. The first step in the process of creating a new product is to identify a market need. This involves conducting market research to understand what customers want and what problems they are trying to solve.</p> <p>2. Once a market need is identified, the next step is to develop a concept. This involves brainstorming ideas and creating a rough sketch of the product.</p> <p>3. The third step is to create a prototype. This is a physical model of the product that can be used to test the concept and gather feedback from potential customers.</p> <p>4. After the prototype is created, the next step is to conduct a feasibility study. This involves evaluating the technical, financial, and market viability of the product.</p> <p>5. If the feasibility study is positive, the next step is to develop a business plan. This document outlines the company's goals, strategies, and financial projections.</p> <p>6. The final step in the process is to launch the product. This involves marketing the product, distributing it, and providing customer support.</p>	<p>1.
